ARE YOUR BONES AND JOINTS AS STRONG AND HEALTHY AS YOU WOULD LIKE?

Natural aging often affects your joints and bones and is common in older populations. Like all living tissue in your body, your bones and joints need high quality nutrients to perform their best.

In addition to a nutrient-dense diet and regular exercise, we also recommend taking an outstanding bone/joint nutritional formula each day, such as Premier Research Labs' OsteoVen™. This comprehensive formula provides premier support for healthy bones, joint function and connective tissue.

This extraordinary bone support product features two key blends: Bone and Joint Max™ and Joint Phyto-Flex Essentials. This product also includes vitamin K2 (important for healthy bones) and natural source calcium and magnesium.
