

PANCREVEN™

Premier Pancreas and Healthy Blood Sugar Support

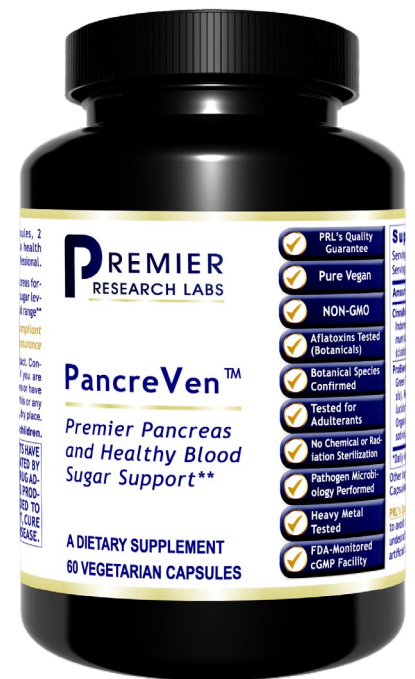

The far reaching role of the pancreas in digestive health.

- ▶ World-class, herbal concentrates featuring pancreas nutrients and synergists
- ▶ Promotes the body's ability to maintain healthy blood sugar level already within the normal range

CINNABOLIC ELITE™! FEATURING INDONESIAN CINNAMON BARK

PancreVen™ is a broad-spectrum botanical formula designed to offer comprehensive support for pancreatic health. Digestive support and healthy blood sugar levels that are already within the normal range can be supported by **PancreVen™**'s secret weapon: Indonesian cinnamon bark!

Cinnamon bark has had a long history of use in traditional healthcare systems and has also been used in modern times as a botanical supplement to target gastrointestinal health as a digestive system aide. The use of cinnamon in nutritional formulas can naturally target the pancreas and support healthy blood sugar levels.

THESE STATEMENTS HAVE NOT BEEN EVALUATED BY THE FOOD AND DRUG ADMINISTRATION. THESE PRODUCTS ARE NOT INTENDED TO DIAGNOSE, TREAT, CURE OR PREVENT ANY DISEASE.

Indonesian Cinnamon (*Cinnamomum burmannii*) is the preferred source of cinnamon, not common cinnamon (*Cinnamomum cassia*).

However, we prefer the use of Indonesian cinnamon (*Cinnamomum burmannii*), which we believe is a superior quality cinnamon, in contrast to the more commonly known (and less expensive) cinnamon (*Cinnamomum cassia*). We object to *C. cassia*'s higher content of coumarin, which can be stressful and even toxic in larger quantities.

THE PANCREAS AND BLOOD SUGAR

The pancreas is the key organ responsible for producing insulin and managing blood sugar levels. Indonesian cinnamon is a powerful aid because it can imitate the effects of insulin by helping to increase glucose transport into cells. Thus, regular consumption of Indonesian cinnamon may help support pancreas health.

PancreVen™ also offers ProBlend Support™, a synergistic blend of green tea extract, reishi mushroom, and cranberry that combines together to deliver additional, broad spectrum nutritional support.

EXPERIENCE PREMIER PANCREATIC SUPPORT

Our ingredients are sourced from high-quality, raw material suppliers based all over the world. Our rigorous testing procedures monitor production of our products from raw material acquisition to the final product production to ensure that our customers will receive the maximum nutritional benefit of our products, without the risk of undesirable and questionable fillers and binders.

Premier Research Labs is committed to producing products of uncompromising quality. In addition, our products are created with no added excipients and with pure, plant-based capsules. Our products have no added magnesium stearate, an undesirable excipient (commonly used in nutritional products) that research shows can suppress the immune system.

We invite you to experience the highest quality pancreatic formula, which promotes healthy blood sugar levels already within the normal range. Our goal is to help you achieve superior nutritional outcomes with your clients in their journey to wellness ... with scientific nutrition at its best.

Make Premier Research Labs your quality standard.
